Capadocia Fairy Chimneys

In the upper Myosen period in the Capadocia region as a result of the vulcanic eruptions occurred in Erciyes, Hasandag and Gulludag, in the region was formed a large tableland from the vulcanic tufas and together with the erosion of the Kizilirmak river and wind over ten of thousands years there appeared the chimney rocks which are a wonder of the nature. In the old Bronze Age the Capadocia which was the population zone of the Assyrian civilization later has hosted the Hittite, Frig, Pers, Byzantine, Seljuk and Ottoman civilizations. The first Christians escaped from the persecution of the Roman Empire in the 2nd century A.D. came to the Capadocia over the Antakya and Kayseri and they have settled here. The first Christians finding the underground cities from Capadocia have been hidden in these underground cities which gates were made in such way in which they couldn't be easily observed and they have escaped from the persecution of the Roman soldiers. Due to that they had lived in the underground cities for long duration without being able to go out they have developed these underground cities by making provisions rooms, ventilation chimneys, wine production places, churches, abbeys, water wells, toilets and meeting rooms.

In the prehistoric periods the first human settlements have begun and the humans have constructed the underground cities in the volcanic rocks in form of tufa due to protect themselves from the wild animals and they lived for a long time in these underground cities. There are so many underground cities in the Capadocia area of Turkey but the biggest is Derinkuyu Underground City.

In these cities made in form of rooms connected to each others some of the rooms were connected to each other only with the tunnels tight and permitting passing of just a person. At the access gates of these tunnels there were huge stone rollers used for closing the tunnels for security reasons.
